EXPERIENCE

Site Reliability Engineer

Dynatrace

Sep 2022 – present

Palma Area, Spain

- Provide development teams independence by the shift-left process giving them an abstraction over deployment cycle and infrastructure.

Site Reliability Engineer and Team Lead

Virtual Cave

Oct 2020 – Sep 2022

Palma Area, Spain

- Guide our clients into implementing a DevOps methodology and making their development teams as autonomous as possible.
- Aid our clients in their Cloud migration by defining the architecture to implement and the technologies to be used.

Site Reliability Engineer

Hotelbeds Technology

Nov 2019 – Oct 2020

Palma Area, Spain

- Define and implement CI/CD workflows that are to be used by company product teams.
- Provide support to other company teams to adapt to new technologies to improve their deployment cycle.
- Implementation of a monitoring platform to help other teams monitorize their services. This was a cost reduction project to leave Datadog and the first one in the company to be deployed in a production environment using Kubernetes.

Linux System Administrator

Hotelbeds Technology

Mar 2016 – Nov 2019

Palma Area, Spain

- Started as an intern operating physical and virtual machines of the company.
- Automate the operation and deploy process to make product teams independent.
- Providing support in terms of infrastructure to the product teams and helping them to achieve a DevOps methodology.

Systems Technician

Infortec and Sermicro SA

Jun 2011 – Mar 2016

Palma Area, Spain

- Provide technical service to Endesa SA.
- Operate and install the Cisco network devices in the Balearic Islands region.

Systems Technician Intern

Jamtli Musem

Mar 2010 – Jun 2010

Östersund, Sweden

- As part of an Erasmus program I traveled to Östersund to offer technical support in the Jamtli Museum.
